Hi Pete, I hope you're having a stellar evening! Hey still no word from EPA's Office of Water on the feasibility of Karl's and your suggested option for just a fish tissue-based chronic aquatic life criterion for mercury. The idea wasn't shot down when I talked with Erica about it on Friday, so I'm going with no news is good news.

I was asked to check in with you - would a disapproval would be ok with ND if we go follow the route discussed? Thanks - just making sure.

Have a great evening!

Holly
